EDUCATION

Harrisburg University of Science and Technology, Harrisburg, PA
Bachelor of Science in Computer and Information Sciences

August 2021- May 2025

WORK EXPERIENCE

Lincoln Intermediate Unit 12

November 2025- Present

IT Help Desk Technician

- Provide enterprise technical support via phone, remote desktop, and in-person within a shared ticket queue.
- Manage users and groups in **Active Directory** and administer **DUO 2FA** authentication. Administer devices across **Windows, ChromeOS, and macOS** using **Google Admin, Mosyle MDM, and Apple School Manager**.
- Install and support **PoE devices, wireless access points, projectors, and network cabling**. Support conference rooms and large-scale events for staff and school operations.
- Troubleshoot Windows, Outlook, PaperCutMF, and system update issues using remote tools.
- Maintain accurate asset inventory for 1000+ devices in the ticketing system.

Foot Locker Corporate Services

IT Server Technician

June 2025 - September 2025

- **Prepare and configure HP servers for deployment** to Foot Locker locations worldwide, ensuring each store receives a fully functional and customized server environment.
- Wipe and re-image servers, installing required files and configurations for seamless integration into store operations.
- **Execute and manage Bash scripts** to automate server setup, applying store-specific information and system requirements.
- Utilize **KVM** switches and remote management tools (**RSM and RSM**) for efficient multi-server maintenance.
- Track and resolve deployment tasks using **Jira** and **ServiceNow** ticketing systems.

Center for Innovation and Entrepreneurship Powered by Harrisburg University (CIE)

Student Developer

April 2024 - August 2024

- Developed and maintained web applications using **Dart, Flutter, JSP, HTML, and JavaScript**.
- Contributed to the design and development of a database system.
- Utilized **Apache Tomcat** to deploy and manage Java-based web applications.
- Collaborated with cross-functional teams to design and implement innovative software solutions based on client requirements.

ACADEMIC EXPERIENCE

Self-Driving Car Project

Fall 2023 - Winter 2024

Technologies: Keras, TensorFlow, OpenCV, Python, Raspberry Pi

Description: Developed a self-driving car model capable of autonomously following a track by processing real-time camera input and controlling motor functions. The system detects track markings and adjusts wheel direction and speed

SKILLS

IT & Infrastructure: Active Directory, Google Admin, Apple School Manager, Mosyle MDM, DUO 2FA, Networking (PoE, APs, Cabling), Asset Management, Remote Support (TeamViewer), VoIP/Softphone Support (Sangoma Talk), Braille Printer Support, Conference Room/AV, Ticketing Systems(Sysaid,ServiceNow), Windows Troubleshooting, PowerShell

Operating Systems: Windows 10/11, macOS, ChromeOS, Linux (Ubuntu/Kali/OpenSUSE)

Programming: Python, Java, JavaScript (React/Node), C++, SQL, Dart, HTML

Databases & Data: MySQL, MongoDB, Relational Databases, Data Analysis with Pandas/NumPy

Tools & Platforms: Git/GitHub, Flask, Apache Tomcat, VirtualBox, Microsoft Azure

ML / Academic Projects: TensorFlow, Keras, PyTorch, OpenCV, Scikit-learn
